

Technical Specification

Air Pump

ACO-328

Model	ACO-328
Power	60W
Voltage	110-120 / 220-240V
Frequency	50/60Hz
Pressure (MPa)	>0.03MPa
Pressure (psi)	~4.35psi
Output	70L/min
Noise	<60dB
Weight (excluding box)	2.8kg
Size (excluding box)	199x108x133mm

Specification

- The case is made of high-quality ZL 102 aluminium alloy, with a streamlined design to make heat dissipation more effective.
- The unit is driven by an electrical magnetic motor, which adopts straight-line reciprocal motion to produce air within its structure.
- The ACO-328 adopts SF3 new type wearable materials for the cylinder and piston, which have a low power consumption, greater air output and high air pressure.
- The unit has a non-oil lubricating design, and the compressed air is purified.
